

Wojciech Hryniewski

Research Engineer/Team Leader at SentiOne

Summary

N/A

Experience

Research Engineer/Team Leader at SentiOne

March 2017 - Present

I am responsible for coordinating the Research Team at SentiOne. Our duties include work on NLP solutions and crawling algorithms for our product.

Software Engineer at SentiOne

May 2015 - March 2017 (1 year 11 months)

My daily responsibilities involved development and maintenance of SaaS product and also some research job in cooperation with Gdańsk University of Technology. I mostly worked in Scala, Java and ReactJS.

Software Engineer at Intel Corporation

January 2014 - April 2015 (1 year 4 months)

My daily tasks included development of cryptographic web services supporting Intel's hardware and design of hosting environment for these services. I was also responsible for implementation of modern automated deployment procedures using Ansible and Docker.

Validation Lead at Intel Corporation

June 2012 - December 2013 (1 year 7 months)

Design and management of the validation process and strategy of production level technology, deeply dependent on both software and platform hardware. Automated tests design. Development in C++ and C# languages.

Software Developer Intern at Intel Corporation

July 2011 - July 2012 (1 year 1 month)

Web services development.

Software Developer Intern

March 2011 - June 2011 (4 months)

Development of internal intranet applications.

Software Developer

July 2010 - November 2010 (5 months)

Development of web trading service.

Education

Technical University of Gdansk

Master's degree, Information Technology, 2007 - 2012
